COMPANY'S PROFILE

SERVICES

1.0. Computer Systems and Servers Supply:

Our company is fully involved in offering high-level solution using products and solution from our partners such as:

- APC
- CISCO
- ORACLE
- IBM / LENOVO
- DELL
- MAC MICROSOFT HP

In meeting up with clients demand and being compete in price, we also offer a wide range of hardware from other manufacturers like Alcatel, Panasonic, Avaya, D-Link, Linksys etc.

2.0. Data Center Infrastructure

We offer high-tech design, set-up and installation of facilities for data and voice communication equipment; mobile or permanent data centers and OB. We design state of the art data center with technological advanced infrastructure to meet clients' needs from start to finish.

Sample Design of Data Center

The furnishing of our data center facilities design includes but not limited to the followings;

- **Cement Concrete Work**
- **Furniture & fixture**
- **Cong** and chipping of existing floors
- **Pardoning**
- **Trench works**
- **Doors and Locking**
- **Masonry works**
- **Painting/ Vinyl covering**
- **Hardware and Metals**

- Fire proofing all surfaces
- Glazing
- Insulating
- Paint work
- Environmental Monitoring Solutions
- False/Raised Flooring
- False/Suspended Ceiling

3.0. Communication Systems & Infrastructure

We design, construct, install and setup communication centers, cell sites, and repeater stations and telecoms towers. We specialize in the installation of BTS, WIMAX, GSM, and CDMA equipment with high level of expertise 2.3, 2.4, 3.8 or 5 GHz frequency-based equipment as the case may be.

Types of Telecommunication Towers

There are different types of communication towers based upon their structural action, their cross-section, the type of sections used and on the placement of the tower. Below are the different types of towers:

- Microwave Towers
- Guyed Towers
- Self-Supporting Towers

4.0. Network Solutions

We design, setup and implement Local Area Networking (LAN), Wide Area Networking (WAN), Metropolitan Area Networking (MAN), Campus LAN and Wireless LAN solutions.

4.1. Local Area Network (LAN)

We are experts in the design, installation, implementation, and maintenance of cabled LAN and Wireless LAN. With several years of experience, your organization can be certain to receive top-notch tailor-made LAN network solution from us.

4.1.1. Cabled LAN

We are professionals at designing, deploying and maintaining a structured cabling system for Data, Voice, and Video based on SYSTIMAX and BRAND-REX Technology.

The process of achieving a standard and effective LAN depends on having a standard cabling system in a place. This cabling system is a term STRUCTURED CABLING SYSTEM.

In the implementation of our designed WLAN, the following standard is used:

- IEEE 802.3; EIA/TIA 568A/B Wired
- Structured Cabling System
- Cable Standards are Categories 6, 6e and 7
- RJ 45 connector standard
- Cables are twisted pair UTP, STP, FTP

4.1.2. WLAN (Wireless Local Area Network)

We have designed WLAN for a large network with users more than 1000 in a mesh network for seamless movement. Our WLAN model ensures optimal bandwidth utilization and gives QOS preference for critical applications. To ensure a secured network, Firewall, Policy-Based Routing and Network Address Translation will be implemented at the edge.

SECURITY OF WIRELESS ACCESS

From the edge at the Core to the Access level, our solution provides an integrated means to manage the security operations within the Enterprise Architecture. The solution combines the ability to manage firewalls, VPNs, network IDS and host IDS, as well as continuously monitor security and performance information.

- The Edge firewall protects the entire network and prevent network intrusion
- Authentication of AP and Client to detect rogue access
- Encryption of Data across AP and Clients.
- Active Directory and ACS user authentication system

4.2. Wide Area Network (WAN) / Metropolitan Area Network (MAN)

We are recognized for our proficiency in the design, implementation, and maintenance of private enterprise WAN made up of leased lines, a frame relay service or an ATM service, point-to point Fiber or Radio connection, MPLX, SD-WAN networks to connect two or more locations together. In the implementation of a WAN/MAN, we use the following technologies to achieve our design:

- VSAT (very small aperture terminal)
- Wireless Radio
- Fiber Optics
- ISDN / DSL and ADSL
- E1 Lines
- LTE

4.3. Internet Connectivity / VPN Services

Technology Advantage's Internet access solutions is a fully managed high-speed Internet services offering direct-to-router, direct-to-LAN connectivity and integrated Internet access for your private networking services with a choice of access media at the last mile [Fiber or Microwave radio]. It offers enterprise-class scalability and access across multiple IP-based infrastructures, along with many of the performance and security characteristics traditionally found only in dedicated private environments. Our service can handle multiple types of Internet traffic such as IPsec VPN, Voice over IP (VoIP) and Video over Demand (VOD).

We carefully design a VPN to take of the following topologies: STAR OR MESHED HYBRID. Our VPN solution provides reliable and fast internet communication for mission-critical applications and branch network connectivity with our teleport based in the USA and 24hrs technical support services.

4.4. VOIP, Data and Video Communication

This is a voice over internet protocol solution that is efficient, reliable and cost saving, suitable for today's homes, public and corporate establishment. We provide seamless data and voice

communication of unbeatable quality. We offer international gateway services for voice connection to the ends of the world.

4.4.1. IP Telephony / Intercom Systems

IP Telephony (Internet Protocol Telephony) is a general term for the technologies that use the Internet Protocol's packet-switched connections to exchange voice, fax, and other forms of information that are traditionally been carried over the dedicated circuit-switched connections of the Public Switched Telephone Network (PSTN). Using the Internet, calls travel as packets of data on shared lines, avoiding the tolls of the PSTN. The challenge in IP Telephony is to deliver the voice, fax, or video packets in a dependable flow to the user. Much of IP Telephony focuses on that challenge.

4.4.2. Video Conferencing / Telepresence

The advancement of technology comes with a lot of change in the way we are able to communicate, connect and even go about business and execute our obligations. One such technology that has brought a revolution in the communications industry is telepresence. As a partner to major OEMs of telepresence solution, we are sure to offer you world class and cost effective telepresence solutions.

5.0. Business Solutions & Applications

As partners with OEM's, we offer various enterprise solutions to suit your business needs, these will surely give a competitive advantage for businesses. They include MS Windows, MS Office suites, Exchange, Backup solutions, etc.

5.1. Enterprise Risk Management / Business Community Solution

We partner with Virtual Corporation INC.USA to offer Business Community Planning Solution (BCPS). BCPS is also known as Business Community & Resiliency Planning (BCRP). The logistical plan used in BCP is called a business community plan. The intended effect of BCP is to ensure business

community, which is an ongoing state or methodology governing how business is conducted.

Our Business Community Planning Software includes:

- Business Impact Analysis (BIA)
- BC Program
- BC Planning

Business Community Planning Software

Business community planning (BCP) Software is software for “planning which identifies the organizations exposure to internal and external threats and synthesizes hard and so assets to provide effective prevention and recovery for the organization, whilst maintaining complete advantage and value system integrity”. To get this done the Business Impact Analysis, BC Program Design and BC Planning has to be in place.

Advantages / Benefits

- Financial management
- Supply chain management
- Project management
- Human resource management
- Customer relationship management

5.3. Enterprise Data Replication

We collaborate with reputable data replication and business community OEM's to offer business community and data replication solution for disaster recovery solution of mission critical operation. A partner such as Oracle, VMware, Oracle, Microsoft amongst many other partners' offers different solution to help achieve high reliability in disaster recover between remote locations for files and applications.

5.4. Asset Management/RFID

We offer the Asset Management solution that gives total inventory control of all the assets in an organization. This enables every organization to determine the location of her assets, date purchased, current value; it also deters the as the assets are bar coded (Bar code printed on a label that has information about the item to which it is attached on)

Our Asset Management Solution provides a wide range of labels that include paper, polypropylene, metal, aluminum all customized to meet your specific need.

Our RFID (Radio Frequency ID) solution is used in departmental stores, fleet management, etc. for high-level asset security on the system. It helps companies protect their valuable assets and stocks from mismanagement and the as it gives various types of alert.

5.5.1. Web Applications

We have skills for a 360° development by offering you with expertise from HTML/CSS to React JS, SQL to Mongo DB and PHP to Node JS. We do Backend, Frontend, APIs, and Server Applications, Web designing, Web development, develops and Maintenance of your servers and applications. We have the best Full- Stack engineers working with us and they have preceded their skills in Mobile Apps API development, Progressive Web App Development, E-Commerce solutions on Magneto, Cloud Migration and Enterprise Web application development.

5.5.2. System Applications

Our seasoned architects help our clients evaluate options to bring their projects to life. The best digital experience requires a robust back-end foundation. Our team has years of experience integrating with back-end and middle ware systems and can evaluate alternatives based on cost, time to market, implementation risk, performance, scaling, and security considerations.

5.5.3. Mobile Applications

We have the proficiency to meet the needs of most industries efficiently in a merely manner by offering native & hybrid android app and IOS app development solutions for all industries. If you have an awesome idea, feel free to contact us and if you do not, reach out to us anyway to build an idea. Some of the different types of apps we build are:

- Nave android apps
- UI/UX Designs
- IOS Apps

6.1. Network Security and Audit

We offer full scale network security features using authenticated IPS/IDS (Intrusion Prevention/Detection System) on the entire network (Firewall and proxy servers, antivirus, Internet Security Software Package). In addition, our employment of virtual private network, digital signatures and additional security at access points ensures that our network auditing capacity is at the highest level.

6.2. CCTV Surveillance Systems

Our key aim for this technical solution is to provide you with a high quality, fast-acting IP based and Analogue surveillance service with 24/7 availability that effectively meets your need.

Our supply, installation, and configuration of high quality fast-acting IP CCTV surveillance systems shall cover:

- High vision and moon sensor
- Facial and Plate number recognition.
- Remote and On-Premise view of CCTV coverage area.
- Analytics

We are recognized not just for our expert level in the supply, installation, and configuration of CCTV but also in ensuring that the appropriate devices and systems are put in place for optimum performance.

We deal in a wide range of CCTV such as:

- Dome CCTV Camera
- Bullet CCTV Camera
- C-Mount CCTV Camera
- Day/Night CCTV Camera

- 
- Infrared/Night Vision CCTV Camera
 - **Network/IP CCTV Camera**
 - **Wireless CCTV Camera**
 - High-Definition HD CCTV Camera

It is important to note that these features are not distinct to different CCTV's as some of them have a number of the features combined to meet the customers need. With respect to your requests, Technology Advantage Network Ltd is willing to put her high level of expertise and over 10 years of practical experience in the supply, installation and maintenance of CCTV systems for your organization.

6.2.2. Biometric Time A enhance Systems

As a partner of major OEMs, we design, supply, install and maintain Biometrics / Card Access Time A enhance Systems for data centers, server rooms, and other environments.

Our systems are tailor- made to give adequate satisfaction, meet desired requirements and work with numerous other existing technologies.

6.2.3. Access Control Systems

As a partner of reputable OEM, we design, supply, install and maintain Biometrics / Card Access Control Systems for data centers, server rooms, and other environments.

Our systems are tailor- made to give adequate satisfaction, meet desired requirements and w o r k w i t h numerous other existing technology.

Our expert base also specializes in the areas below:

- **Boom Gate**
 - **Sliding Gate Operators**
 - **Swing Gate Operators**
 - **Super market Gates**
 - **Turnsole & Flap Barriers etc.**
- 

7.0. Cloud Services

Technology advantage offers cloud solution to meet the various needs of individuals and corporate organizations. Our cloud solution includes the local and remote systems for storage, data replication services, applications servers, and mail services. This helps save many investments for companies especially startups and thereby increases the company's profitability. As partners of VMware, IBM, Oracle, Microsoft and other Cloud service providing companies and our vast experience in Cloud Computing, we provide top of the class cloud computing service to organization to meet their needs at the right price.

Our cloud services;

- Helps you to store web contents and big data.
- Back up archive critical data and helps to run applications remotely.

7.1. IaaS (Infrastructure as a Service)

With IAAS, Instead of having to purchase the hardware outright, users can purchase IaaS based on consumption, similar to electricity or other utility billing.

Compared to SaaS and PaaS, IaaS users are responsible for managing applications, data, runtime, middleware, and OSes. Providers sell manage virtualize on, servers, hard drives, storage, and networking. Many IaaS providers now offer databases, messaging queues, and other services above the virtualization layer as well. IAAS Examples: Amazon Web Services (AWS), Cisco Metapod, Microsoft Azure, Google Compute Engine (GCE), Joyent

7.2. PaaS (Platform as a Service)

With PaaS, developers gain a framework they can build upon to develop or customize the application. PaaS makes the development, testing, and deployment of applications quick, simple, and cost effective. With this technology, enterprise operations, or a third-party provider, can manage OSes, virtualization, servers, storage, networking, and the PaaS

software itself. Enterprise PaaS provides line-of-business software developers a self-service portal for managing computing infrastructure from centralized IT operations. Similar to the way in which you might create macros in Excel, PaaS allows you to create applications using software components that exist on the PaaS (middleware). Applications using PaaS

Inherit cloud characteristics such as scalability, high-availability, multi-tenancy, SaaS enablement, and more. Enterprises benefit from PaaS because it reduces the amount of coding necessary, automates business policy, and helps migrate apps to a hybrid model.

7.3. SaaS (Software as a Service)

Our SaaS applications can be run directly from a web browser without any downloads or installations required, although some require plugins. Because of the web delivery model, SaaS eliminates the need to install and run applications on individual computers. With SaaS, it is easy for enterprises to streamline their maintenance and support, because vendors can manage everything: applications, runtime, data, middleware, OSes, virtualization, servers, storage and networking.

8.0. Power Systems and Electrical Installation

We have expertise in design, supply, installation and maintenance of the following:

- i. AC power system (low voltage)
 - ii. DC power system including
 - Inverters
 - Rectifiers
 - Battery Bank
 - iii. UPS
 - iv. Electrical cabling and Installations
 - v. Power Network Systems
 - vi. Earthing System
- 

8.1. AC Power Systems (Electrical Installation)

Our experts are also specialized in the design, supply, installation, and maintenance of the electrical system.

Many of our customers prefer us because we have a more holistic view of how the system works as a whole. We see beyond just the system but the purpose for which the system is designed, thereby enabling us to give you the best tailor-made solution that suites you.

8.2. *Inverters*

Technology Advantage Network Ltd is willing to put her high level of expertise and over 10 ` years of practical experience in supply, installation and maintenance of inverters to ensure optimum power uptime and systems longevity.

As partners with the makers of reputable inverter industries both locally and globally, you can be rest assured that you are getting the best product and services at the most cost-effective price.

With respect to the customers demand, our solution can offer as much as:

- Reducing long term running cost using the energy generated from Solar rather than high cost of electricity.
- **Reducing downtime by 99.9%.**
- **Reducing maintenance cost of sensitive devices with low tolerance for power fluctuation.**

8.2.2. *Rectifiers*

Our vast pool of experts is available to provide and install all kinds of rectifiers to meet the needs of your homes and organizations.

We supply and install different types of rectifiers that includes:

- Half Wave Rectifiers
 - § Positive Half Wave Rectifiers
 - § Negative Half Wave Rectifiers
- Full Wave Rectifiers

8.3. UPS

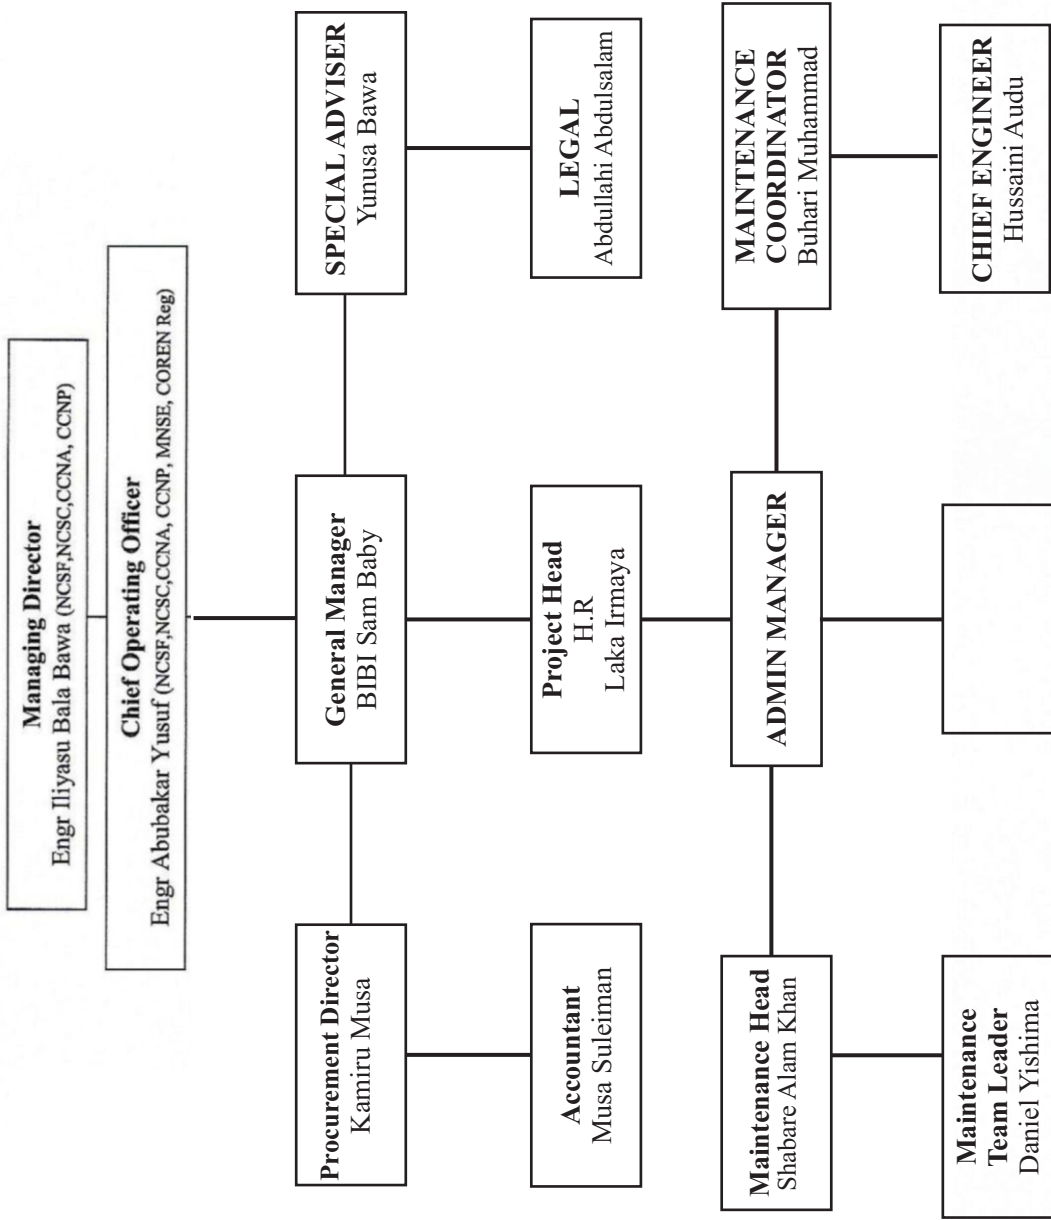

An uninterruptible power supply or uninterruptible power source (UPS) is an electrical apparatus that provides emergency power to a load when the input power source or mains power fails. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide near-instantaneous protection from input power interruptions, by supplying energy stored in batteries, super capacitors, or flywheels. The on-battery run-time of most uninterruptible power sources is relatively short (only a few minutes) but sufficient to start a standby power source or properly shut down the protected equipment. It is a type of continuous power system.

With respect to your requests, Technology Advantage Network Ltd is willing to put her high level of expertise and over 10 years of practical experience in the supply, installation and maintenance of UPS systems for your organization.

The minimum benefits you can get from our solution includes:

1. **Power Consistency and Community:** Our UPS will ensure there is no break in power supply when there is a power outage. It also regulates power during spikes, surges and brownout, ensuring your business runs smoothly.
2. **Prevents Significant Loss of Data:** Our UPS ensures that no electrical devices stop running when there is an outage, so all of your data will be protected and you have time to either power down important services or connect to your backup generators to ensure no data is lost.
3. **Protects Machines/ Equipment :** In a similar way to data protection, our UPS ensures that no damage happens to sensitive machinery. It gives you time to correctly power down or turn on backup generators.
4. **Reduced Noise:** unlike backup generators, our UPS has almost no noise output, meaning it will not disrupt your day-to-day activities and can be installed almost anywhere.

CURRICULUM VITAE

SHABARE ALAM KHAN District Ayodhya (U P). E-Mail: sabrealamkhan@gmail.com Cell

No:- +91 9555563296

AN OVERVIEW

- *A dynamic professional with ten years of experience in operation and maintenance and process improvement projects of fiber and copper O&M.*
- *A vital experience of civil works and supervising installation of manhole, mailing of trench, duct laying placing spacers and installation of FTTB and Great knowledge in OSP network*
- *Adept in troubleshooting and problem resolution train and mention the quality adherence to work order specification*

OCCUPATIONAL CONTOUR

Working with 21st Century Technology Limited., Nigeria Since March 2014 as an OFC Supervisor fiber Operation and Management.

Area of Exposure:

Project Management
Operations & Maintenance
Service Operations

- ☞ Supervising network planning, Designing AND implementation of communication links, trial run and testing activities.
- ☞ Maintaining the ERT and provide effective solutions for the communication network.
- ☞ Operating and maintaining the facilities involving corrective & preventive maintenance for trouble-free operations with maximum machine uptime..
- ☞ Conducting cost benefits analysis of the projects including feasibility studies, assessments of requirements.

Customer Relationship

Installation & Commissioning

Team Management

SKILL SET

Working with OFC Splicing of OFC of STM-1 STM-4 and STM-16 transmission links PDH and SDH links and Fiber to home. Fiber Maintenance and operation with the FUJIKURA 50S/FUJIKURA 60S/FUJIKURA 70S/FUJIKURA 50R/FUJIKURA 60R, OTDR AFL, OTDR MTS 6000, OTDR MTS 8000 and VFL

PROFESSIONAL EXPERIENCE

Working with Telesuprecon Nigeria limited as an OFC SITE ENGINEER since 05 may 2017 for different Project MTN ,Airtel Metro & Backbone in North Nigeria till Now.

Work profile

1. Working with new project for new customers communication links.
2. Supervision and planning for new project of different areas with Ducting, cable pulling.
3. Conduct AT with client for acceptance of fiber route.
4. Airtel Project in North Nigeria ,Kaduna,Kano, Yola ,Gombe ,Bauchi ,Jos and some other state .
5. Airtel More than 1000km, MTN, 1500KM, & Last project Galaxy BB Project also Kaduna-Zaria.
Most of project completed in Northern Nigeria successfully.

- Working with 21ST Century Technology Limited., Nigeria Since April 2014 as Team Lead Fiber Support..

Work profile

- Maintenance of existing network as well as new project to interconnect with STM rings from exchange to exchange.
- Working with new project for new customers communication links.
- Maintenance of E1, Ethernet and P2P links of different customers. with different capacity.
- Supervision and planning for new project of different areas with Ducting, cable pulling.

PREVIOUS JOB PROFILE

Carrycon International Contractors LLC Dubai (3 oct 2012 to Nov 2013)

Work profile

- Maintenance of existing network as well as new project to interconnect with STM rings from exchange to exchange.
- Maintenance and troubleshooting of FTTH for ETISALAT Dubai in Ras-al-khaimah, Sharjah and Ajman region
- Operation and Maintenance of copper cable from Exchange to cabinet and Cabinet to Customer DP in Ras al khaimah, Sharjah and Ajman region
- Handling system maintenance and optimization with key emphasis on trouble-free network connectivity and performance.

PREVIOUS JOB PROFILE

Aster Teleservices Hyderabad AP (6 Oct 2009 to 20 Dec 2010) for Afghan Telecomm Kabul

- Copper cable jointing ,troubleshooting of 5 pair upto 2000 Pairs of copper cable of different regions at Kabul.
- Maintenance of copper cable from MDF to cabinet and cabinet to customer DP , Cable pulling and laying of copper cable.
- Handling system maintenance and optimization with key emphasis on trouble free network connectivity and performance.

DEBUGGING TOOL

- ,Optical Power Meter, Laser Source, OTDR, 50s, 60s, 70s and 80s Splicing machine, cleaver, stripper.

SCHOLASTICS

- Diploma In Electronic & Communication 2008-2010.
- Intermediate from U.P Board Allahabad in 2007.
- High School from U.P Board Allahabad in 2005.

- Introduction to Cybersecurity by Cisco Networking Academy 2021
- Network Cabling specialist Fiber optic Based system 2016
- Network Cabling Specialist Copper Based System 2016
- Voice Communication Professional (VCP) 2016
- Certificate Of Recognition In Network Cabling, (Leviton Network Solution Texas United State OF American, 2016
- CCTV Camera Installation With DVR 2015
- Cisco Certified Network Associate (CCNA), 2015
- Diploma in Computer and Network Maintenance, (DCNM), 2015

WORKING EXPERIENCE

- Jewel IT Consultancy and Electrical Engineering Services as a LAN Project Manager 2014-2016
- Kano Electricity Distribution PLC (as Network and Electrical Engineer) 2016-2021
- Yunkam Global Nigeria Limited as a Site Engineer 2011-2015

SKILLS AND COMPETENCE

- Cisco Certified Network Associate (CCNA)
- Good in oral and writing communication.
- A team player, creative and improviser.
- Self-Motivated, Team motivator, Confident and Global oriented.
- Open minded to learning, smart and drive for excellence.

CAREER MISSION: to work in a challenging and target -driven environment as a team, with total commitment of s kills and knowledge acquire through training and field work, well appreciate through very attractive and market-driven remuneration

Professional Profile –

- * MAB with more than 15 years' experience in Retail Stores with relevant experience in management level.
- * Excellent experience in handling multiple stores, merchandising and stock management.
- * Recruiting, Training and managing staff
- * Ability to organize & deploy resources optimally.
- * Creative, aggressive and self-motivated.

EMPLOYMENT SCAN – 15yrs +

• Abercrombie & Fitch/Hollister Qatar	March 2017 to till date	Store Manager
• Splash –Landmark group	April 2015 to March 2017	Store Manager
• Paul Smith -India	Oct 2013 to April 2015	Store Manager
• ETRO-Milano- India	July 2010 to Sep 2013	Store Manager
• Calvin Klein & Miss sixty - Dubai	Nov 2006 to May 2010	Store Manager
• Springfield- Dubai	May 2004 to Oct 2006	Store Supervisor
• XX BY MEXX -Dubai	July 2003 to May 2004	Store Supervisor
• Springfield - Dubai	April 2002 to July 2003	Customer Service Representative

- Actively use sales information to make business decisions to maximize sales opportunities through commerciality & outstanding customer service.
- Provide clear direction & ensure co-operation between all areas of the store team.
- Ensure Sales team deliver highest possible levels of customer service in store & that this is prioritized at all times to maximize sales.
- Achieve company sales targets.

- * Ensure the store consistently reflects highest possible standards of merchandising,

Abercrombie & Fitch/ Hollister - "Store Manager" (MAF) –March- 2017 – Till date

Responsibilities:

Store Performance – Driving Sales

- Constantly demonstrating a pro-active approach to driving sales and uses initiatives to increase sales and business improvement through awareness of KPIs', targets set and analysis of This Year V's Last Year, ATVs' and ATUs'.
- Ensure accurate knowledge of Brand performance, best sellers and stock levels to generate ideas and action plans to increase overall sales.
- Identify key causes of underperformance, and drive actions to respond to those causes through action plans, analysis and commercial awareness.
- Have the enthusiasm and 'passion' to deliver a 'result focused' service through communication and attitude, ensuring efficiency and superior customer service.
- Providing critical analytical feedback to the Operations and Buying and Merchandising Department regarding product, ranging, pricing and competitive activities and opportunities.

Highest Customer Service Standards

- In conjunction with the Operations Managers ensure the 'Key' priority targets and goals in customer service are consistently achieved appropriate to each Brand through a 'Passion' for fashion attitude.
- Ensure their team delivers the best service to the customers through understanding of what 'great service' looks and feels like.
- Has outstanding product knowledge about the Brand and its philosophy so to be able to educate, motivate and inspire their team.
- Constantly assessing the team's performance against set key criteria and providing constructive feedback to ensure commitment to continuous improvement aiming to excel.
- Always lead by example by providing consistent exceptional service standards.

Operational Standards, Processes and Practices

- housekeeping & recovery.

Always present the store to the highest of Model Store Standards (VM) and take personal accountability of the development of the team in the understanding of the VM principles and to deliver those VM standards.

- Delivers excellence when implementing and executing any event through creative solutions by thinking 'outside the box'.
- Continually deliver and review in-store duties such as cleaning procedure, Pre-opening inspection and check lists.
- Plan, organize and execute in-store processes such as cash handling, stockroom and stock take administration management.
- Check cash intakes and ensure cash drop is captured correctly prior to banking.
- Overall accountability and oversee compliance of subordinates with established Company's policies and standards, such as safe keeping of funds and property, personnel practices, security, sales and record keeping procedures.
- Store inventory is well controlled and adequate security exists, stock shortages are kept to a minimum, all items are tagged and Stock Loss Action Plans (SLAP) are in place.

Safety codes and ordinances are being complied with and achieving a result

Splash - "Store Manager" (Landmark group) –April 2015 – March 2017

Responsibilities:

- Running stores and departments to meet a company's targets and policies.
 - Conduct staff training and orientation.
 - Complete store operation requirements by scheduling & assigning employees, following up on work results.
 - Create a professional buying atmosphere.
 - Maintain store staff results by coaching & disciplining employees, planning, monitoring & appraising job result.
 - Market merchandize by studying orders, sales promotions & display plans.
 - Ensure availability of merchandize & maintain inventories.
 - Develops and implements store operating plans, policies and procedures in line with corporate branding in order to achieve and exceed sales and profitability objectives.
 - Manages staff recruitment in order to ensure the recruitment of high caliber staff that enables the store to meet its objectives.
 - Ensures the stock is effectively measured and controlled and manages order placement requisitioning activities in order to maximize sales and meet stock performance objectives. Formulates pricing policies by reviewing merchandising activities; determining additional needed sales promotion; authorizing clearance sales; studying trends.
 - Secure merchandize by implementing security systems.
- 

- Maintains the stability and reputation of the store by complying with legal requirements. Maintain operational coordination & personal policies and procedures.
- Achieves financial objectives by preparing an annual budget; scheduling expenditures; analyzing variances; initiating corrective actions.
- Solves critical store operational problems including customer's complaints, in order to ensure operational effectiveness and to increase customer's satisfaction.
- Prepares management information reports on store performance in order to ensure that her brand manager has the relevant information needed to support operational decision-making.
- Prepares staff schedule in order to ensure that the Shop manpower is effectively matched to the shops operational requirements that will enable the achievement of the highest standards of customer service at optimum cost.
- Maintains the stability and reputation of the store by complying with legal requirements. Ensures the effective communication of sales plans and targets to the Shop team, managing performance, developing and motivating employees, in order to ensure the highest levels of performance and the achievement, or exceeding, of sales targets.
- Responding to customer complaints and comments.
- Maintains the stability and reputation of the store by complying with legal requirements.
- Maintain contact with all customers to ensure high levels of customers Satisfaction & identify their needs.
- Initiating changes to improve the business, e.g. revising opening hours to ensure the store can compete effectively in the local mark

Paul smith & Etro - "Store Manager" (Genesis Luxury Pvt) –July- 2010 – April 2015

Responsibilities:

- Contributes to achieving sales target in line with the shop business plan
- Ensure staff are motivated, managed and well trained-on brand profile, concept, product knowledge and customer service.
- Ensure stock is accounted for and proper records kept. Implement proper stock controls to minimize stock losses.
- Ensure store is maintained to high standards in terms of layout, merchandising and staffing as per company guidelines.
- Analyze, monitor sales and stock and recommend to the VP ways to improve the brand and store performance.
- Maintain close contact with the Head office support (Logistics, Finance, VM, and Retail Operation) functions.
- To provide and communicate all customer/merchandise quality feedback to VP Retail for decision making process and development of the brand.
- Conduct regular formal, documented staff performance reviews
- Ensure that suitable records of work undertaken are kept in accordance with company procedures and policies.

Abercrombie & Fitch/ Hollister - "Store Manager" (MAF) –March- 2017 – Till date

Responsibilities:

Store Performance – Driving Sales

- Constantly demonstrating a pro-active approach to driving sales and uses initiatives to increase sales and business improvement through awareness of KPIs', targets set and analysis of This Year V's Last Year, ATVs' and ATUs'.
- Ensure accurate knowledge of Brand performance, best sellers and stock levels to generate ideas and action plans to increase overall sales.
- Identify key causes of underperformance, and drive actions to respond to those causes through action plans, analysis and commercial awareness.
- Have the enthusiasm and 'passion' to deliver a 'result focused' service through communication and attitude, ensuring efficiency and superior customer service.
- Providing critical analytical feedback to the Operations and Buying and Merchandising Department regarding product, ranging, pricing and competitive activities and opportunities.

Highest Customer Service Standards

- In conjunction with the Operations Managers ensure the 'Key' priority targets and goals in customer service are consistently achieved appropriate to each Brand through a 'Passion' for fashion attitude.
- Ensure their team delivers the best service to the customers through understanding of what 'great service' looks and feels like.
- Has outstanding product knowledge about the Brand and its philosophy so to be able to educate, motivate and inspire their team.
- Constantly assessing the team's performance against set key criteria and providing constructive feedback to ensure commitment to continuous improvement aiming to excel.
- Always lead by example by providing consistent exceptional service standards.

Operational Standards, Processes and Practices

Standards and Housekeeping

- Ensure the Company's commitment quality and vision is reflected in maintaining standard and housekeeping.

Cost Control Measurements

- Implementing Effective Cost Control Measurement by using stationary within the reason, petty cash in urgent situation and handling equipment's and stock very carefully.

XX BY MEXX - "Store Supervisor" (Barman Center, Dubai, U.A.E.)-July 2003- May 2004

Responsibilities:

- Responsible on day to day running of the business
- Staff Rotation
- Merchandising in-store and window display
- Space Management
- Best Seller
- Stock take and warehouse procedure
- Monitoring in-coming and out-going of stocks
- Till procedure
- Maintaining good customer relationship
- Handling customer complaints as per company policy
- Maintaining inventory and other records as per company requirements
- Staff development/Training/Administration/Banking
- Replenishment
- General shop management

Achievements :-

- Actively participated in opening of "XX BY MEXX" KUWAIT.

SPRINGFIELD - "Customer Service Representative" (Al Ghurair Retail. Dubai, UAE) April-2002- July2003

Responsibilities:

- Customer Service
- Stock Merchandising.
- Operational Issues, Conducting and Auctioning regular floor walks to set the department to high standards and shopper friendly.
- Stock issues / checks.
- Making use of Space Management and Best Seller Reports.
- Window Display Issues.
- Season and Phase Launch Issues.
- Administration Tasks: Generating Various Reports like Daily Sales Report, Stock Consumption, Sales by product group, daily picking list (Replenishment) daily and weekly, job planning / rotes.

- Sale / End of range preparation & functioning.

Achievements:

- Actively participated in opening of “SPRINGFIELD” Kuwait and Deira City Centre, Dubai.

EDUCATION –

MBA (Master of Business Administration) 1999 – 2000

(Southern Adventist University, Tennessee, USA- Spicer College External Examination Center, Pune, Maharashtra)

BBA (Bachelor of Business Administration) 1994 – 1999

(Spicer Memorial College, Pune Maharashtra)

Higher Secondary Certificate (12th Standard) 1994

(SDA School, Trichy, Tamilnadu.)

Matriculation Examination (10th Standard) 1992

(SDA James Memorial School Prakasapuram)

PERSONAL VITAE -

Date of Birth : 26th May, 1976

Marital Status : Married

Languages Known : English, Hindi

**CV AND CERTIFICATE OF
DIRECTOR, RESEARCH & PROCUREMENT**

Aliyu ISAH
Email: aliyuisahbabanta@gmail.com
Mobile Number: +2347035652985
Contact Address: IBTECT Global NIG LTD

Biodata

- Date of Birth : 3 April, 1989
- Sex: Male
- Marital Status: Married
- Nationality: Nigerian
- State of Origin: Kano State
- Languages: Hausa, English and French (A2)

Career Objectives

To make a positive impact in a society:
Technologically, Socially and Morally.

Hobbies/Interests

Reading, research, work, sport, travel, helping and meeting people.

Skills and Know how

- Good communication
- Fast learning
- Social dedication
- Resourceful, creative and versatile
- Connaissances informatiques
- Effective team work and self-motivated
- Scientific research in the following domain:
 - Electronics, informatics and instrumentation
 - Signal and image processing
 - Machine Learning and Deep Learning
 - Circuit design and Simulation
- Practical work, such as installation of electrical devices and systems, and many others
- Disponibility

Institutions attended

- Université de Bourgogne (ImViA, UB), Dijon, France
- Kano University of Science and Technology, (KUST) Wudil, Nigeria.
- Government Technical College (GTC) Bagauda
- Government Secondary School (GSS) Chiromawa.
- Chiromawa Idi Special Primary School (SPS).

Diplomas obtained with date

- PhD en électronique, instrumentation et informatique (UB) [2021]

- M.Sc. in Advanced Electronic System Engineering (UB) [2017]
- B.Eng Electrical & Electronics (KUST) [2014]
- NABTEB/WAEC/SSCE (GTC) [2008]
- Primary School Certificate (SPS) [2002]

Working/Professionnelle experience with years

- Scientific research in the field of electronics, instrumentation, nanotechnology etc... [4 years].
- Supervision of project for master's students.
- Level 100 coordinator
- Lecturing at Kano University of Science and Technology, Wudil, Nigeria [2016 to date].
- Wiring and installation of electrical services (self-employed) [3 years].
- Electrician at Lela agro sacks industry ltd [3 months]
- National Youth Service Corps (NYSC): Community Development Services (CDS) and Teaching service at Kwanchi Government Day Secondary School [1 year]
- Teaching sciences courses, Physics and Mathematics in secondary schools: G.S.S, G.G.S.S and S.A.I.S Chiromawa [3 years].

Projets

- Application of memristors in nonlinear network for information (signal and image) processing and electronic prosthesis.
- Analog model of memristor.
- Design of Operational Transconductance Amplifier (OTA) using Python programming.

Programming/Softwares

MatLab, Python, SPICE (LTSPICE, PSPICE, etc.), LaTeX, Word etc...
